

RE: 47CFR97.1(c) and (d)

Proposed RM-10811 is the only recently submitted Proposal that fully complies with ALL requirements of the quoted 47CFR97 paragraph.

Technical knowledge of each transmission mode with one [1] exception can be verified by written examination. Morse Code transmission, CW, can only be verified by test.

In the interest of achieving and maintaining both 'communication' skills and providing 'skilled operators, technicians and electronic experts' I support RM-10811.
